APPROVAL..... OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the 1.45 c.f.s., herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to a beneficial use. A suitable measuring device must be installed and accurate measurements of the water placed to a beneficial use must be included in the proof of such use when filed. The State retains the right to regulate the use of the water herein granted at any and all times.

This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed..... 1.45..... cubic feet per second, but limited to 1,049.76..... acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before..... December 22, 1987

Proof of completion of work shall be filed on or before..... January 22, 1988

Application of water to beneficial use shall be made on or before..... December 22, 1988

Proof of the application of water to beneficial use shall be filed on or before..... January 22, 1989

QUESTION #12:

The appropriated water from un-named hot springs would not be diverted from its past or present flow direction. Appropriation of this water would allow it to continue its present low path through natural channels, ditches and a series of existing artificial and natural ponds provide marsh and wetlands areas for recreation and waterfowl habitat and nesting.

This spring water is supplemented by about 1.54 cfs of treated sewage effluent imported into the Carson River Basin from the Tahoe Basin directly to the place of use.

the rest of it is
 to be excluded from POU
